TEACHER REVIEWS

“Very pleased with these simple activities. I like that these sheets help to reinforce and practice skills being taught in class.” -Lynn N.

“I LOVE this resource. When I do station rotations, I always include one station that is a work practice station. These work pages are perfect for that. Minimal directions are needed and they can complete them on their own. It’s perfect.” -Millicent F.

“I love these quick printable resources for math and literacy. These would be great to supplement lessons or to use for earlier finisher tasks. Thanks for creating this quick and easy resource.” -Amanda V.
