Students will roll the dice, and cover that many spaces on their gameboard. Then, they will continue to roll and cover until the entire game mat is filled.

What's included?

RACE TO 120

The image displays ten different 'Roll & Race to 120' game boards, each with a unique theme and a grid of numbers from 1 to 120. The themes include Christmas (with a strawberry and a tree), a runner, a girl with confetti, a snowman, a monkey holding a heart, a girl brushing teeth, a girl with flowers, and a girl with a frog and a rabbit. Each board is a 10x12 grid of numbers, with the starting number varying by board (e.g., 1, 2, 3, or 103).

Students can also play it as head-to-head partner game. Students will need their own gameboard and take turns rolling the dice. The first player to cover every space wins!

These activities are great for early finishers, math centers, or morning work.

Students need dice and crayons, markers or colored pencils to complete the activity.

To use them as a math station, print pages on cardstock. Laminate the pages for added durability. Then, students can use manipulatives such as mini erasers or snap cubes to cover the spaces as they roll and race!
